*In the seven years since the attacks on New York & Washington those 'in the know' about what happened, as opposed to those still clinging to the 'official conspiracy theory' now number millions throughout the world, thanks to the welter of websites, books and films on 9/11. Yet two major obstacles delay ultimate breakthrough: press & media complicity in the cover-up, and the continued preference of many to 'blank out' the issue altogether, rather than face an unpleasant and unsettling reality. How can these be overcome??*
